## BLACK CAT – THE BEST WAY TO CATCH

**“The benchmark in  
catfish angling for over 10 years.”**

Modern catfish angling is booming and is currently more popular than ever. More and more anglers are travelling as far as beyond the borders of Europe to seek out the challenge of pitting themselves against one of the largest freshwater predators. For years, Zebco Europe has been a strong and reliable partner offering the catfish angler innovative new products, tried and tested small accessories and ultra-strong, high-quality rods and reels.

Stefan Seuß, one of the world's most successful and renowned catfish experts, invests all of his know-how and experience in the product range, delivering new products and methods every year to guarantee targeted catches of large catfish. Stefan is supported in his development work by a line-up of the most successful and innovative catfish anglers from all over Europe. With their help and the ability to bring together countless test verdicts and experiences on a whole variety of water types, he is able to hone perfect angling equipment and accessories for every situation until they are ready for market launch. Following the principle that 'to stand still is to move backwards', Black Cat strives to continuously improve, to adapt to new conditions and to create trends in order to meet the demanding requirements of the European catfish scene.

Catfish are now found in all types of water, with large specimens lurking even in the smallest rivers and ponds. Black Cat offers tried and tested equipment for all approaches and angling methods so that targeted catches do not have to be left to chance. We are also continuously exploring innovations and enhancements of various angling equipment in order to guarantee catches of cautious catfish on heavily fished waters in future. Success on the water is no coincidence. We spend thousands of hours a year testing equipment to create a healthy mix of practicality and quality standards and all at a fair price-performance ratio.

Many of the trends we developed have laid the foundations for modern catfish angling and are copied relentlessly by other manufacturers. However, the differences between catching and drawing a blank lie in the detail.

Besides having the optimal equipment, our video blogs and catfish workshops with end customers at the water's edge make successful catfish angling a cert. We put our heart and soul into developing the equipment of tomorrow and Stefan Seuß and his team anglers invest every spare moment on the water, setting standards in catching record fish. Black Cat equipment has accounted for more than 50 catfish over the 100 kg mark in recent years, a benchmark unrivalled by any other tackle manufacturer.

Countless satisfied customers have been instrumental in these achievements. We would like to thank you sincerely for putting such great faith in Black Cat angling equipment.

Black Cat – The Best Way to Catch

**EXTREME FD**

The workhorse for catfish anglers. If you want to mix it with giant fish, you are going to need extreme equipment. The Black Cat Extreme offers a huge line capacity, an indestructible stainless steel axle and a power handle for optimal power transfer combined with an ultra-strong drag. As a catfish angler, this reel will equip you for every situation, whether you want to present your bait over 300 metres away when fishing long-range or even directly among obstacles for "no holds barred" angling. A fighting machine for every application. In contrast with the size #95 version, the new model (size #105) with its simply incredible line capacity has a manual bail arm.

**STANDARD TECHNICAL FEATURES:**

- Rotor produced in aluminium to be completely distortion-free
- Aluminium body and sidecovers
- Oversized multi-stack drag system
- Oversized handle knob for optimal power
- Titanium-nitride-coated line roller with anti-twist system
- Robust bronze and stainless steel gears
- Aluminium spool
- S-curve line distribution
- Multistop anti-reverse clutch

Code	Model	m / mm	Gear Ratio	Retrieve	BB	Drag F.	Weight	RRP £
0273 095	495	540 / 0,45	4,4:1	108 cm	4	27,2 kg / 60 lbs	1100 g	225.00
0273 105	4105	700 / 0,45	4,4:1	110 cm	4	27,2 kg / 60 lbs	1135 g	229.00

**BATTLE CAT SPIN FD**

Specialist angling with artificial lures for catfish is now highly popular. For the active angler, Black Cat has introduced a spinning reel that leaves nothing to be desired. Two sizes cover a range of applications, such as long-cast angling with heavy lures over long distances, fishing at mid-range for bank wanderers, short-range fishing for boat anglers who want to present their bait close to hot spots from a moving boat or jigging close to the bottom with heavy weights for vertical angling fans. The reel is built to last forever and is specially equipped for use with braided lines. The axle, gears and bail are as good as indestructible. The heat-dissipating drag system will give even the biggest catfish a good fight.

**STANDARD TECHNICAL FEATURES:**

- Rotor produced in aluminium to be completely distortion-free
- Housing produced in aluminium to be completely distortion-free
- Oversized multi-stack Offshore drag system
- CNC stainless steel handle
- Titanium-nitride-coated line roller
- Exclusive TiMag™ system: Maintenance-free magnetic bail arm folding system
- Gears made from a super-hard stainless steel alloy
- Aluminium Long Stroke™ spool
- S-curve line distribution
- Foot Forward™ reel foot for better rod balance

0274 080	880	270 / 0,45	4.9:1	95 cm	8	18,1 kg / 40 lbs	697 g	149.00

**STANDARD TECHNICAL FEATURES:**

- Ultra-strong aluminium housing, sideplates and rotor
- Finely adjustable, protected Magnum CSC™ front drag system (carbon drag discs)
- Oversized handle knob for optimal power
- MegaShield™ multi-layer coating

**STANDARD TECHNICAL FEATURES:**

- Balanced rotor, producing silky smooth action
- Robust nylon housing
- Oversized multi-stack drag system
- Die-cast aluminium handle
- Large line guide
- Thick bail arm for optimal balance
- Robust power gears
- Two-speed oscillation system
- Continuous anti-reverse

**PASSION PRO FD**

For newcomers to catfish sport and young anglers in particular, Black Cat offers a reel that stands up to the harsh requirements of catfish angling in every department. The high line capacity combined with twist-free axle and power handle make the Black Cat Passion reel a perfect partner to the catfish rod.

Code	Model	m / mm	Gear Ratio	Retrieve	BB	Drag F.	Weight	RRP £

**LONG RANGER**

The ultimate weapon for wels anglers. Multiplier reels play an important role in modern wels angling. Enormous line capacity, ultra-strong gears and punching out bait over very long distances are just a few factors in favour of multipliers. Other important criteria include simple feeding out of the rig through automatic braking of released line via the finely adjustable drag system. The Black Cat Long Ranger has an enormous line retrieval of 127 cm with a full spool as well as 7 ball bearings. We have deliberately omitted a line guide and T-bar to ensure perfect line outflow. Thanks to the relatively narrow yet deep spool, the line arranges perfectly when retrieved. Stefan Seuß tested the reel for a year and was hugely impressed by the reel's indestructible workmanship and the associated range of uses on the water.

**STANDARD TECHNICAL FEATURES:**

- Fully machined one-piece aluminium housing
- MegaDrag™ stainless steel and carbon fibre drag system
- CNC stainless steel handle
- Super-hard, oversized brass gear components
- Continuous anti-reverse

BC8

**BUSTER**

The introduction of the Black Cat Buster offers catfish anglers a universal multiplier reel at an outstanding price-performance ratio. The housing is milled entirely from aluminium, providing a low weight of just 780 grams. The finely adjustable disc drag allows perfect drag setting during a fight as well as controlled line release when presenting your rigs. With a line capacity of 350 m/0.5 mm, the Buster perfectly covers all aspects of modern catfish angling. The high gear ratio of 6.1:1 and line retrieval of 110 cm also allow fish that bite at long distances to be steered quickly and powerfully into closer range. The Buster multiplier features a very loud clicker, which immediately alerts the angler to line removal with an unmistakable noise when a large catfish bites.

Code	Model	m / mm	Gear Ratio	Retrieve	BB	Drag F.	Weight	RRP £

- MegaShield™ multi-layer coating

**BATTLE CAT VERTICAL**

The workhorse for the active angler. Following huge demand and prolonged testing, Stefan Seuß introduces the first left-handed multiplier reel with a perfect blend of power and a lightweight design. The Battle Cat Vertical is designed for active fishing with fireballs, a catfish clonk and vertical baits, while the perfect handling offers the angler fatigue-free fishing. The 15 kg drag strength and line capacity of 300 m/0.2 mm provide the perfect conditions for battling the largest catfish in our waters.

**NEW**

**BUSTER LH**

Multiplier reels have become indispensable in modern catfish angling. Numerous advantages in terms of line capacity, controlled line guidance when laying out the bait and enormous power transfer during the fight speak for their use. Many catfish anglers prefer to use a left-hand model habitually. By introducing the Buster 650 LH to the market, Black Cat offers exactly this kind of tool! The Buster 650 LH is based on a one-piece aluminium housing and has a net weight of only 750 grams. Its high gear ratio of 5.2:1 ensures a line retrieval of 110 cm which allows for fatigue-free and quick retrieval of the bait, even from long distances. With a line capacity of 450 m at a line diameter of 0.5 mm even very distant swims can be fished easily. The super-strong, finely adjustable MegaDrag™ lever drag system delivers an enormous 16 kilos of drag pressure, which forces every conceivable opponent to turn around. The large and ergonomic handle knob enables fatigue-free fishing and allows you to handle large opponents safely. We deliberately omitted a line guide and a so-called T-bar. This ensures a perfect line run and allows the angler to access the spool at all times to further increase the drag pressure by hand. Thanks to the relatively narrow yet deep spool, the line arranges perfectly when the bait is retrieved.

**THE CAT LIMITED EDITION**

The Cat was specially developed by Stefan Seuß and is a limited edition model. The high-quality, no-frills silver and black design with a discreet Dark Camou handle makes the rod timeless, high-quality and inconspicuous. The blank has true fighting power and, thanks to the special ring arrangement, is suited to both multiplier and fixed-spool reels. The 3 m version has been specially developed for bank anglers who want to cast their bait into strong currents on a river or over long distances when buoy fishing on a lake. The Cat is a flagship model for modern catfish anglers, leaves nothing to be desired in terms of quality and finishing and, with its balanced, parabolic blank guarantees true fighting pleasure with smaller catfish and offers huge power reserves for battling with the fish of a lifetime.

**CAT BUSTER MULTISTYLE**

Special rod for use with multiplier reels whether from the bank or the boat. This rod is designed for die-hard angling in conjunction with a multiplier reel and has an optimal test curve during a fight thanks to the high number of rings. Even long-range fishing is easily mastered with the Multi Style.

**CAT BUSTER VERTICAL**

The Cat Buster Vertical is the active workhorse in the Buster rod series and comes in an inconspicuous black colour. The speed and sensitivity of the power blank is incredible. The rod guarantees fatigue-free raising and lowering of even heavy vertical lures, allowing the angler to enjoy perfect bait control at every moment. The Buster Vertical can be used with a multiplier or fixed-spool reel.

**CAT BUSTER SPIN**

Active fishing for catfish with soft lures and spoons is very successful and can be done on all waters from the shore or boat with little effort. We from the Black Cat Team present the Buster Spin, a universal spinning rod for catfish angling. With a length of 270 cm and casting weight of 40-150 g, this rod is excellently suited for bank and boat fishing alike. The blank is made of indestructible DF (durafiber) material and despite its light weight has unbelievable power during the fight. This means that the Buster Spin combines sensitive bait retrieval with a fast blank action during the strike, even at long casting distances. We have attached great importance to balanced 8 + 1 Fuji rings with a large butt ring in order to be able to achieve long casting distances. The TVS Fuji reel holder reliably secures every catfish reel and offers comfortable and balanced rod handling during casting and when fighting large catfish.

**CAT BUSTER GODZILLA**

The name says it all. You will not find a stronger rod! With a length of 3.2 m and casting weight of 1 kg, the Godzilla is the ultimate weapon for defeating boss monsters. When a swim is lined with the kind of obstacles that form the habitat of the largest catfish, when there are brutal fights to be won and when the conditions require you to fish at distances of more than 300 metres with XXL baits, the Godzilla comes into its own.

**CAT BUSTER**

The cult rod among catfish anglers. No other rod has landed more 100 kg catfish than the Buster. The universal rod for all applications is based on a fantastic combination of power and a parabolic action. The Big Game rings and Fuji reel holder make the Buster a veritable gem and even allow the use of a multiplier reel. With the Buster, you are ideally equipped to battle genuinely exceptional specimens on any water worldwide.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	RRP £

16490 300	Bank	3,00 m	2	600 g	1,56 m	570 g	77.95

**BLACK PASSION**

Black Passion represents uncompromising catfish angling at a favourable price-performance ratio. This series of rods is ideal for novices and anglers on a tight budget, who still want to use a reliable catfish rod. The Black Passion series impresses with high-quality matt black visuals, strong twist-free reel holders and robust rings suited to use with both multiplier and fixed-spool reels. The blanks can easily withstand loads of more than 20 kg and offer a parabolic action that perfectly absorbs the runs of smaller catfish as well as sufficient power to reliably put the brakes on the surges of larger specimens.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	RRP £
16491 330	Black Passion Long Ranger	3,30 m	2	600 g	1,69 m	689 g	81.95

**BLACK PASSION LONG RANGER**

The Black Passion Long Ranger is a value-for-money all-round rod for long-range fishing with a buoy rig or stone rig and provides sufficient backbone to exert enough pressure on laid-out rigs or a hard-fighting catfish even over long distances. Bank anglers who want to cast out their rigs are also in the best of hands with the Black Passion Long Ranger.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	RRP £
16492 240	Black Passion Spin	2,40 m	2	50 - 200 g	1,30 m	330 g	61.95
16492 270	Black Passion Spin	2,70 m	2	50 - 200 g	1,40 m	379 g	64.95

**BLACK PASSION SPIN**

The Black Passion Spin comes in two lengths and optimally covers the wide-ranging requirements of a catfish spinning rod. The large rings allow long-range casting while the lightweight blank, which offers sufficient power reserves in a fight, allows the use of spoons, soft lures and wobblers as well as sensitive, fatigue-free fishing whether at close quarters or over long distances.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	RRP £
16493 180	Black Passion Vertical	1,80 m	1	240 g	1,80 m	257 g	49.95

**BLACK PASSION VERTICAL**

The Black Passion Vertical is a true all-rounder when it comes to active fishing from a boat and combines sensitive bait presentation on a vertical rig with a rapid blank that transmits every twitch perfectly to the angler's arm. In a fight, the Black Passion Vertical impresses with its immense power that will tame any catfish.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	RRP £
16426 280	Freestyle	2,80 m	2	400 g	1,47 m	515 g	191.95
16426 300	Freestyle	3,00 m	2	400 g	1,54 m	630 g	207.95

### FREESTYLE

Freestyle fans take note: the Freestyle is available in a new design. The blank has been made even more robust with a special Duralfibre material blend, while Big Game Seaguide rings and a Fuji DPHS reel holder provide deluxe equipment. The Freestyle combines all of the requirements of a perfect wels rod and is a true all-round talent on the European scene.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	RRP £
16425 240	Freestyle Boat	2,40 m	1+1	400 g	1,46 m	450 g	175.95

### FREESTYLE BOAT

Boat fishing for wels is becoming increasingly popular and many wels anglers often stay on their floating homes for several days to fish inaccessible swims. The Freestyle Boat has been developed precisely for this purpose since deadbaiting from the boat does not require a long rod and the angler is actually better equipped with a short rod. The Freestyle Boat can be fished with a multiplier or fixed-spool reel while the Uptime rod joint provides bear-like strength in a fight and saves space during transport. The Freestyle Boat is fitted with eight indestructible Seaguide rings and a Fuji DPHS reel holder that holds all standard reel models securely. Finally, Freestyle fans have the perfect rod for active and passive fishing from a boat.

### WILD CAT'Z BEAST

Some fishing situations call for power and length. The WILD CAT'z "Beast" has been designed for those very occasions. The rod is ideally suited to heavy buoy fishing, XXL lures, long-distance presentation and hook & hold fishing in front of obstacles. The indestructible DF Blank, a robust Fuji H-22 reel holder and Seaguide rod rings were already features of the popular Wild CAT'z Uptime 285 cm. Never change a winning team, as they say, and we have equipped this rod with the unique fully parabolic action for fatigue-free fighting from the boat or bank once again. Deep areas of rivers and large lakes require direct tightening of the main line above the water surface. We have created a 20 cm longer companion for your angling adventures with moderate transport dimensions thanks to a typical two-sectioned design. Beast mode on!

### WILD CAT'Z SPIN

The WILD CAT'z "Spin" will allow you to reach areas of water previously untouched by any lure. We have developed a veritable long-range casting machine. The rod is completely at home on the locks and military areas of European rivers. Thanks to the rapid carbon-fibre blank and K-Frame rings with a 35 mm butt ring, we have made the rod shorter for optimal light handling when short spinning from a drifting boat or for overgrown bank areas in the deepest wilderness. The inconspicuous Wild Cat'z design is excellently suited to such natural conditions.

### WILD CAT'Z

Those who like to fish for wels off the beaten track cannot look past the WILD CAT'z! The rod has been developed by Peter Merkel. The results is an all-round partner is a unique, inconspicuous design. The Uptime joint provides a fully parabolic action almost equivalent to that of a one-piece rod for fatigue-free fighting from the boat yet sufficient power for long-distance buoy fishing from the bank. Equipped with an indestructible DF blank, Fuji reel holder and Seaguide rings, this rod is a match for any adventure.

### WILD CAT'Z VERTICAL

The Wild Cat'z vertical rod is the "adventure stick" for anglers who like to present their baits beneath a drifting boat with a clonk or fireball systems. The slender, fully parabolic power blank allows bait retrieval with maximum feel. A tailor-made Fuji reel holder for fixed-spool or multiplier reels, robust Seaguide rings and an aesthetic EVA end cap complete this high-quality one-piece rod. The blank, lacquered with the Wild Cat'z design, and camo-duplon handle are inconspicuous on the water but are guaranteed to turn heads on the bank.

### FIREBALL

The Fireball has been specially designed for use with heavy fireball systems and large baits. On waters with strong currents and deep channels, such as the Po in Italy, the Rhone in France or the Rhine in Germany, this rod is at home and perfectly equipped for active fireball fishing on the bottom. The Fireball can be used with a multiplier or fixed-spool reel.

### VERTICAL

The Vertical ticks every box for the active angler. The one-piece jig rod provides a stiff yet sensitive power blank that guarantees perfect lure retrieval and die-hard fighting fun. The length of 1.8 m is perfect for presenting vertical rigs on the bottom from a boat or belly boat. The Vertical can be used with a multiplier or fixed-spool reel.

### SPIN STICK

A special rod for spinning and active fishing with small soft lures, wobblers and spoons, whether from the boat or the bank. The light blank allows hours of fatigue-free casting while the fast action of the rod tip perfectly transfers the action of the artificial lure to the angler's arm. This spinning rod combines a very light power blank with incredible reserves of power in a fight. The Spin Stick can be used with baitcaster reels or fixed-spool reels.

### SOLID FUN

The name says it all. The Solid Fun is a feather-light, one-piece full-carbon rod equipped with a 30 kg blank. The rod perfectly combines light bait retrieval and fatigue-free fishing with die-hard fighting fun. Whether vertical fishing, clonking with a catfish clonk or spinning from a boat, the Solid Fun means fun and big catfish.

**BATTLE CAT BOAT**

The Battle Cat Boat has been specially designed for modern boat fishing. The rod is equally suited to drifting or fishing taut rigs from an anchored boat. The balanced blank parabolics allow the angler to reliably fight large catfish and has extreme power in reserve without troubling the angler when fighting from a boat. The Battle Cat Boat can be used with either a multiplier or fixed-spool reel.

**BATTLE CAT INLINE**

Inline rods have been the preferred choice of many French and Italian catfish anglers for many years. This rod type is ideally suited to active vertical angling, clonking and jigging. The carbon inline blank offers a fantastic and almost indestructible action. Line tangling in the rings is a thing of the past thanks to line guide. Excellent for freestyle catfish fishing where the angler holds the line in his hand and strikes by hand. The true strength in this rod is particularly evident during the fight, but for the catfish their efforts are in vain. Threader included.

**BATTLE CAT SPIN**

The all-rounder when it comes to modern spinning for monster specimens. With a length of 270 cm and a casting weight of 80-180 g, the Battle Cat Spin covers all bases in modern spinning. The rod is equally suited to sensitively retrieving small wobblers as it is to punching out large and heavy spoons. The components used for this high-end spinning rod leave nothing to be desired and guarantee the catfish angler high standards in quality and strength.

**BATTLE CAT FUN**

The magic wand in the Battle Cat Range. The Fun is a universal talent suited to light and medium spinning and clonking and jigging with small to medium-sized soft lures on the bottom. Thanks to the Uptime handle design, the blank can withstand the highest stresses, yet remains light and sensitive. Fighting fun is guaranteed.

**SILU SPIN**

The Silu Spin was developed in cooperation with Thomas Bula. Not only a feast for the eyes but also the ideal rod for modern short spinning. This involves fishing at short distances from the boat or overgrown banks and flicking your lure straight in front of the catfish mouth. The one-piece blank guarantees perfect lure control and an abundance of power in close-range fights. This light yet fast rod produced with only the best materials takes all of the effort out of active sessions from a canoe or belly boat over several hours. The ultimate fun factor is guaranteed.

**SILU CAST**

The Silu Cast is a special rod fitted with a trigger handle for light and intermediate catfish angling. With its stylish BC design and indestructible blank, the well-balanced rod provides for sensitive bait retrieval during active fishing for catfish. The parabolic action with soft-touch tip enables the smallest lures to be cast out with control and jigged on the bottom yet has sufficient power to attractively present vertical rigs of over 120 grams in a strong current.

**CAT LIGHT SPIN**

Targeted spinning for catfish is highly successful and increasingly popular. Our latest findings and our experiences on the water show that the smaller lures in particular can often yield better results than XXL spoons. The new Cat Light Spin is specially designed for use with small plugs, light soft lures and spinnerbaits. The slender DF blank guarantees excellent casting and fighting properties. The Light Spin is available in three lengths. The 2.6 m version is particularly suited to boat anglers and short-range fishing from the bank while the 2.8 m version is designed for long-range casting from the bank.

**SILU VERTICAL**

The successful "Silu" rod range has been extended with the Silu Vertical, a special rod for fans of very short and rapid rod blanks for active fishing with vertical rigs in a stylish Black Cat Design. The slender one-piece DF blank with a length of 160 cm is perfectly suited to presenting baits sensitively beneath the boat, allowing the angler to react to even the most cautious bites with a firm strike. The one-piece power blank delivers fantastic fighting properties when taking on giants directly beneath the boat.

### BAIT MAKER FEEDER

Successful catfish fishing requires a wide selection of lures. On the Po, the catfish like mullet while on the Rhone they prefer XXL bream and on the Ebro, carp are on the menu. A good catfish angler needs the perfect equipment for catching baitfish on every tour. It is precisely for this reason that we have developed a universal rod equipped for all situations from hard-core river fishing to light stillwater sport. With the BC Bait Maker, you are always on safe ground, with the opportunity to use three interchangeable tips, each with different casting weights. The BC Bait Maker is produced in the proven and robust Black Cat quality, impressing with two-legged rings and a design to satisfy the toughest demands of a catfish angler.

**S-LINE**

8-strand, round, extremely durable, braided main line for all aspects of modern catfish angling. S-Line impresses with its very tight braid that absorbs almost no water, combined with an incredible breaking strain, making the line perfectly designed for long casts when spinning and weightless, long-range tensioning of the line when buoy fishing. The yellow colour makes the line very easy to spot in the dark or when visibility is poor. S-Line was tested under the harshest conditions in modern catfish angling by Stefan Seuß for 12 months and earned the title "100% reliable when fighting record fish"!

Code	Ø	Length	BS	Colour	RRP £

**FRONT ZONE LEADER**

The leader is a crucial element of your rig in catfish angling. Whether there are stones, mussels or sharp obstacles in the water, the BC Frontzone Leader will protect your terminal tackle thanks to its incredible durability. The black super braid sets itself apart with its 1 mm diameter and 100 kg breaking strain. A major advantage is that the BC Frontzone Leader can be spliced to create a perfect connection with any main line.

Code	Ø	Length	BS	Colour	RRP £
2365 100	1,00 mm	50 m	100 kg / 220 lbs	black	24.95

**MONO LEADER**

Monofilament leaders are one of the secrets of the success of Catfish special-ists. Incredibly friction resistant, invisible, self-hooking due to the stiff rig characteristics and anti-twist, to mention only a few selling points. Mono Leader is suitable for clonk angling, legering and buoy fishing. This leader material is indestructible and Stefan's first choice for large Catfish sport.

Code	Ø	Length	BS	RRP £
2345 120	1,00 mm	50 m	54 kg / 120 lbs	7.95
2345 150	1,20 mm	50 m	68 kg / 150 lbs	8.99
2345 170	1,30 mm	50 m	77 kg / 170 lbs	8.99

**RUBBER COATED LEADER**

The Black Cat Rubber Coated Leader provides catfish anglers with numerous sophisticated rig options. The core of the leader is a soft yet highly durable braid while the outer layer is rigid and very smooth. Parts of the outer layer can be removed to make the leader rigid and tangle-free towards the top of the rig and soft and flexible towards the bait to retain optimal bait movement. It is also possible to use the Rubber Coated Leader as a stiff rig, which is advantageous in a strong current and reduces twisting of the leader through heavy bait movement.

Code	Ø	Length	BS	Colour	RRP £
2399 070	0,80 mm	20 m	70 kg / 154 lbs	grey	19.95
2399 100	1,00 mm	20 m	100 kg / 220 lbs	grey	21.95

**POWER LEADER**

The leader is the link between catfish and angler and makes the difference between success or defeat. That is why Black Cat uses only the best materials and a tight interlacing of countless individual strands. The Power Leader is incredibly durable yet soft and supple so that the catfish does not suspect a thing when taking the bait. The leader is suitable for all conceivable types of bait presentation and is Stefan's first choice when it comes to using braided leaders. In 2012 and 2013, the leader accounted for several 100-kilo catfish including two record fish on the Po of 122.5 and 127 kg.

Eco Friendly

**STONE RIG LINE**

Environmentally friendly all-round line for catfish angling. The Black Cat Stone Rig Line is ideal for tying stone rigs and back lead rigs where the line is left behind at the bottom after the fish has been caught. The line consists of natural fibres, which dissolve completely and in an environmentally friendly manner after only a few days in the water.

Code	Ø	Length	RRP £
2358 200	2,00 mm	100 m	3.99

**"DG Coating", the innovative coating with a much smoother surface than Teflon®. 4 times higher corrosion resistance compared to conventional coatings.**

**CAT HOOKER DG**

Stefan Seuß made it a personal challenge to perfect the hair rig. Many new hook prototypes were tested but it was the Cat Hooker that completely convinced Stefan. Thanks to the almost round design, baitfish have sufficient play to move naturally. The round shape of the Cat Hooker is also conducive to successful hooking. The wire thickness has been selected to make the Cat Hooker as strong as an ox yet inconspicuous. The welded eye also allows the use of monofilament leaders, making the Cat Hooker a true all-rounder.

**POWER RIG HOOK DG**

The name says it all! The Power Rig Hook is as strong as an ox yet highly sophisticated. With its extended shank, the hook twists aggressively into the fish's mouth, giving the long, sharp tip an easy job and ensuring very effective hooking. The bent and welded eye is also suitable for monofilament leaders without the hook sticking outwards. "DG Coating", the innovative coating with a much smoother surface than Teflon®. 4 times higher corrosion resistance compared to conventional coatings.

**CURVED POINT TREBLE HOOK DG**

As the name suggests, the difference between the Curve Point Treble and standard treble hooks is the inward-bending tips. Once the Curve Point Treble has taken hold, it digs its claws in and does not let go of its prey. It is almost impossible for the hook to pull out. Made from the finest steel, the treble can withstand any load. The Curve Point Treble can be used with all common catfish rigs and has particularly proven itself with soft natural baits such as worms or calamari. "DG Coating", the innovative coating with a much smoother surface than Teflon®. 4 times higher corrosion resistance compared to conventional coatings.

**TREBLE HOOK DG**

The classic treble. Once it makes contact with the mouth of a catfish, the hook immediately buries itself deep and keeps tight hold of its prey. The razor-sharp tips of the treble make setting the hook a piece of cake. The steel is ultra-strong yet smooth. The Treble Hook can be used with rigs for fixed-spool fishing as well as for vertical fishing or spinning. A must in any tackle box! "DG Coating", the innovative coating with a much smoother surface than Teflon®. 4 times higher corrosion resistance compared to conventional coatings.

**MEGA HOOK DG**

The Mega Hook is the most universal single hook on the market. With its unique design and bent tip, the Mega Hook ticks practically every box in terms of hook features. The long, sharp hook tip sets itself effortlessly in the fish's mouth, whether on a dead-bait rig or a multi-hook rig for livebaits. When you want to use a single hook, look no further than the Mega Hook. The bent and welded eye even allows monofilament leaders to be used without a hitch. A single hook that belongs in every tackle box! "DG Coating", the innovative coating with a much smoother surface than Teflon®. 4 times higher corrosion resistance compared to conventional coatings.

**GRIPPER GHOST HOOK**

The Ghost Gripper Hook is one of the most innovative hook series to ever hit the catfish market. This model shares the same properties as the Gripper Hook. However, the spears on the rear of the Ghost Gripper Hook allow attachment to the side of the baitfish. The spears are inserted beneath the skin of the bait, allowing the Ghost Gripper Hook to replace a large and conspicuous treble. The Ghost Gripper Hook combines optimal hooking properties with inconspicuous presentation. Best suited to deadbait rigs and multi-hook rigs. Good disguise is half the battle!

**BUZZER-HOOK**

The Buzzer Hook is based upon a Ghost Hook with an additional spinner blade on the bend of the hook. The spinner blade turns with the slightest water resistance, creating an additional source of attraction and swirls of water directly near the baitfish. The Buzzer Hook can be easily used on the flanks of baitfish with livebaits and on deadbait rigs in flowing water based on the Ghost Hook principle. The Buzzer Hook can also be used as an additional hook with active casting and vertical fishing, mounted onto soft lures.

**U-FLOAT "TREE"**

Tree U-Float, made in Germany. This special U-Float creates tantalising swirling and additional turbulence directly in front of the bait and can be used as a floating device with deadbaits, livebaits and alternative baits. Flowing water passes through the Tree U-Float and creates individual little flow channels above the bait directly downstream. Catfish cannot ignore this!

**LIGHTNING FLOAT**

Light and bright colours attract catfish and this new invention from Stefan Seuß combines precisely these factors in an underwater float used directly above the bait. The Lightning Float offers the catfish angler inserts on both sides for standard 4.5 mm snaplights, creating a light source directly above the bait. On clear waters in particular, the Lightning Float is an absolute catching machine.

BS	yellow	red	RRP £

**MICRO U-FLOAT**

The small, streamlined floating devices, available in weights of 1.5 g and 3.5 g, are completely inconspicuous above the bait, guarantee catches and enable extremely attractive bait presentation on heavily fished waters. Micro U-Floats present baits just off the bottom. Depending on the bait size, several Micro U-Floats can be used on the leader at the same time, creating greater buoyancy with less water turbulence on the leader. Even when fishing in stone packing, Stefan Seuß advises using Micro U-Floats to present the leader and bait apparently weightlessly above the sharp stone edges. The bright neon yellow and neon red colours are used in clear water conditions, creating a visual attraction for catfish.

**PROPELLER U-FLOAT X-STRONG**

The godfather when it comes to presenting livebaits, deadbaits or bunches of lobworm just off the bottom. The X-Strong Propeller U-Float is machined in one piece making it indestructible. The 3 wings make the U-Float rotate on the leader even in slow-flowing water. The swirling of the water caused by the rotation of the U-Float drives catfish into an aggressive frenzy. Available in the major colours glow-in-the-dark, UV red and black.

**DEAD FLOAT**

This special U-float system brings deadbaits to life and produced fantastic catches during testing and development on waters where livebaiting is banned. The floating body is positioned just behind the head on the back of the deadbait and the clips are pushed into the sides of the fish. This restores the deadbait's realistic behaviour in the water and starts to produce a tantalising swimming motion in the current without twisting. Ideal in flowing water with slender deadbaits, such as trout, chub and asp.

**FRONT ZONE WEIGHT**

Coated catfish lead for freestyle and buoy rigs. The Front Zone Weight is fixed directly to the leader around 10 cm above the bait and ensures reliable bait presentation at the desired depth even in strong currents. When using livebaits, the Front Zone Weight also ensures a lower casting radius of the baitfish and hence a better catching rate.

**CAT BALL**

The Cat Ball is without doubt the most effective way to build effective vertical rigs. The vertical head comprises a heavy lead covered with a rubber coating in glow-in-the-dark or matt black colours and has a round design with a flattened underside. This allows the bait to be presented on the bottom without making a sound. Two stainless steel eyes protruding at 90-degree angles offer the perfect fixing points for the main line and the bait and enable rapid baiting as well as extended bait presentation without tangling.

**NEW**

**LINE DIVER**

Special sinking lead for catfish angling. When catfish angling, it can be very important in many situations to sink the main line of a laid-out rig to prevent boats from sailing over the line, for instance, or to present a rig inconspicuously beneath the surface. When fishing with a U-Float on a river, it is also advisable to use a Line Diver to allow flotsam and grass on the water to simply drift over the tightened line and to counteract the line noises created in the current. The line clip of the Line Diver can be adjusted to any line diameter, holding the main line securely beneath the surface. When striking or pulling sharply on the rig, the Line Diver is tripped and releases the line. The Line Diver is attached to the bank or boat via a 20-metre mooring line with a handle.

Code	Length	Weight	Content	RRP £
6202 450	20 m	450 g	1 pcs	12.95

**NEW**

**CAT BOMB**

**CAT BOMB**

Specially coated catfish lead for all leger and casting rigs. With its flat design and nodules, the lead can withstand even strong currents and is highly inconspicuous on stillwaters, lying flat on the bottom while creating reliable counter-pressure on the rig when a fish bites to ensure secure hooking in the mouth of the catfish.

Code	Weight	Colour	RRP £

**SIDE PLANER**

Planers in two different sizes with release clip. Enables rigs to be held out in the current away from the shore. After a bite it releases and slides up underneath the leader knot so it does not interfere in the fight.

Code	Length	RRP £
6329 001	15 cm	10.95
6329 002	20 cm	12.95

**NEW**

**2 FREE CORK STICKS**

**DEAD BAIT PUNCHER**

An innovative and all-round puncher for all types of baitfish. The Puncher was specially developed by Stefan Seuß for presenting attractive deadbaits. The sharp, offset insert tube penetrates like a razor blade into the back of the deadbait and removes the loin with a simple twist of the Puncher. The resulting hollow in the baitfish can now be filled with deadbait sticks or cork sticks, lending the deadbait a natural, neutral buoyancy. In the current, the deadbait starts to swim very realistically and will trick any catfish in the river.

Code	Length	RRP £
6360 001	40 cm	17.95

**GOBY RIG**

Special leader for presenting small fish or bunches of lobworm on a clip system. The leader is particularly successful on rivers and works miracles on the German Rhine when fished with gobies.

Code	Model	Length	Hook Size	BS	RRP £
4336 112	L	200 cm	2/0/8/0	100 kg / 220 lbs	9.99
4336 113	XL	200 cm	3/0/10/0	100 kg / 220 lbs	9.99

**BATTLE RIVER SPOON**

The long-range hunter for catfish anglers. With its perfect shape, the Battle River Spoon is ideal for ultra-long casting and creates strong pressure waves beneath the surface on the retrieve. Even with a slow retrieve in a strong current, the spoon wobbles tantalisingly and imitates catfish's prey. The spinner blade on the treble hook provides additional attraction and closely resembles the flapping caudal fin of an escaping prey fish. The slender design makes the spoon perfect for fishing beneath weirs and in rapid currents with strong turbulence. The Battle River Spoon can be retrieved either slowly in deep layers of water or quickly along the surface. The perfect spoon for active river fishing.

Length	Weight	Content	Hook Size	copper	gold	silver	RRP £

**SPIN RIG**

Special rig for spinning. Prevents the lure from tangling on the cast and protects against biting.

Code	Length	BS	RRP £
4336 008	50 cm	100 kg	6.50

**BATTLE SPOON**

The Battle Spoon has been specially developed by BC Team anglers for fishing with spoons for catfish. The special design creates a striking lateral motion beneath the surface and provides perfect flight properties when casting to reach even remote hotspots. The moment it hits the surface of the water, the Battle Spoon creates a thudding sound that drives catfish into a frenzy, while the strong lateral swimming motion creates swirling under the water and allows the lure to be slowly retrieved while perfectly imitating medium-sized prey.

**CAT SHAD**

At a length of 18 cm, the Cat Shad is an all-round shad for the active catfish angler. Whether on a river or lake, whether fished vertically or rapidly retrieved on a spinning rod, the BC Shad creates lateral movement when used with light weight heads and produces enormous pressure waves with its pronounced tail rudder. The compact body allows the BC Shad to remain highly stable even in strong currents and on fast retrievals. Ideally suited to combining with the Black Cat Shad Claw Rig.

**VIBE**  
action

**NEW**

**BC VIBE**

High-frequency active lure for boat and bank anglers. The BC Vibe is the product of prolonged testing by the Black Cat team and creates strong vibrations under water that drives catfish into a frenzy. The Vibe can be fished vertically from a drifting boat, whereby the lure is accelerated with a jerking rod motion before being allowed to tumble downwards again shortly after in a sinking phase controlled by the angler. For bank anglers, the Vibe is suited to all-round use like a spinner, being retrieved after casting at a steady rate from the bottom, up through all layers of water to the surface. Thanks to its special design, including a fat stomach and a narrow back, the rubber-coated full-lead lure creates extreme pressure waves that no catfish can resist. To minimise missed bites, there are additional hooks in the stomach and tail areas. Both extra-strong treble hooks are coated with the tried and trusted DG Coating!

**BATTLE TEASER**

The Battle Teaser, equipped with glass beads, is a catching machine for active anglers. The Teaser can be used as a lure when fishing with a catfish clonk or can also be jigged closely along the bottom as a vertical lure. The rubber tentacles pulsate tantalisingly in the water while the glass beads emit a loud, clanking sound in the water, which ramps up the aggression of the catfish.

**EXTREME BAG**

The Black Cat Extreme Bags are produced in a unique, waterproof and ultra-strong storm fabric and have a roll-top design with a double-clip system. The bags are 100% waterproof and mud-resistant to protect important equipment and clothing. The medium bag is ideal for storing clothing, shoes, bedchair covers and valuables such as keys, wallets and rod licences. The large bag provides sufficient room for large sleeping bags and numerous items of clothing. Material: 100% Polyurethane

**EXTREME BEDCHAIR COVER**

The Extreme Bedchair Cover has been specially developed for fishing from the bank or the boat and for sleeping in the open air at any time of year. The BC Extreme fabric is 100% waterproof and protects the angler's sleeping bag and bedchair from rain and dirt. The cover has robust clips on the bottom, allowing it to be attached to the bedchair to provide reliable protection even during wind and storms. The over-sized design ensures protection for all bedchair models on the market. The metal eyes in the fabric also allow the Extreme Bedchair Cover to be used as a shelter or tarpaulin with the aid of a few handles and a bankstick. Material: 100% Polyurethane

Code	Length	Width	Colour	RRP £
8541 003	225 cm	107 cm	khaki	83.30

**EXTREME BEDCHAIR BAG**

This waterproof Bedchair Bag will protect the angler from dirt and mud, sheltering the bedchair from extreme weather both during transport and at the water's edge. This ideal choice for those anglers who use a boat to transport their equipment during a session. The XL Bedchair Bag has a shoulder strap and carry handles to make transport even easier and provides adequate room for all current bedchair models. Even your sleeping bag and a bivvy table can be transported in the Bedchair Bag. Material: 100% Polyurethane

**NEW**

**EXTREME OVAL UMBRELLA**

Extra-large umbrella with the popular Nubrolly concept. The shaft can be screwed in laterally and thus does not interfere in the centre under the canopy. The solid aluminium ground spike is designed to withstand the most extreme conditions and is indestructible. The oval design offers so much space that even modern carp bedchairs with a length of 2.10 m will fit underneath. The extra robust workmanship with sealed seams and especially robust rib holders makes this umbrella very durable. Additional features such as 4 eyelets for tent pegs/tensioning ropes in the rear area as well as 4 storm pole adapters at the front round off the complete package. This umbrella is built for the most extreme situations. Including 4 Bivvy Pegs. Material: 100% Nylon Polychlorid coated

Code	Width	Height	Depth	RRP £
9983 345	345 cm	260 cm	305 cm	134.90

Supplied without line.

**LEADER DISPENSER BAG**

Special wels leader bag that allows you to neatly store three leader spools and to roll off the required leader material from the spool in the bag. Material: 100% Nylon

Code	Ø	Width	Colour	Compartments	RRP £
8515 013	15 cm	11 cm	black/yellow	4	16.95

**RIG WALLET**

Special protective wallet for Catfish rigs. All rigs are stored in a plastic sleeve, protected against dirt and water. Material: 100% Nylon

**ROPE KEEPER**

Special mesh bag for transport and ventilated storage of wels rope, wels sheet and wels gloves. Material: 100% Polyester

Code	Length	Width	Height	RRP £
8517 053	22 cm	30 cm	22 cm	14.95

**BAIT KEEPER**

Small, compact keepnet for keeping live bait etc. fresh and close to your boat. With buoyancy ring to keep it upright and swimming. Can be closed from the top.

Code	Ø	Width	Height	Mesh	RRP £
7049 001	55 cm	39 cm	70 cm	8 x 5 mm	37.95

**BAIT NET**

Baitfish hand net for boat and shore anglers. The rubberised net protects fish skin. The landing net is perfectly suited to catching baitfish quickly and reliably from a keepnet or transport container.

Code	Length	Width	Height	Mesh	RRP £
7040 001	0,60 m	31,50 cm	21,00 cm	15 x 10 mm	27.95

**UNHOOKING MAT**

Large, robust cover in Black Cat design, protects catfish from stoney and hard surfaces. Material: 100% Polyurethane

Code	Length	Width	RRP £
8517 022	300 cm	200 cm	49.95

**BAITFISH TUNNEL**

Special keepnet for boat and bank anglers. A wire spiral on the interior prevents the keepnet from collapsing and provides an optimal and protective holder for baitfish whether on stillwaters or in strong currents. The keepnet folds away economically for transport. Material: 40% Polyester, 60% Polychlorid

Code	Length	Ø	Mesh	RRP £
7049 002	0,75 m	55 cm	2 x 8 mm	55.95

**KEEP NET**

Special keepnet for catfish anglers. The landing net mesh is rubberised to protect fish skin. The net length of 3 m allows it to be held securely whether on flowing waters or stillwaters. The landing net can be safely sealed on the top side via a pull mechanism. The robust strap also makes it ideal for boat anglers.

Code	Length	Ø	Mesh	RRP £
7055 001	3,00 m	45 cm	7 x 5 mm	66.60

**UNHOOKING AND WEIGHING MAT**

Hard-wearing unhooking mat that can also be used as a weighing mat. Can comfortably hold fish up to 100 kg. Material: 100% Nylon Polychlorid coated

Code	Length	Width	RRP £
8517 025	2,30 m	1,00 m	91.60

**BED CHAIR COVER**

Fleece cover with water and dirt-resistant surface. The cover can be used either as a sleeping bag cover or, in the warmer months, as a blanket at the water's edge. A particular highlight is the integrated mosquito net in the upper ceiling area, which can be pulled across above the angler's head in the event of a mosquito invasion and offer protection. Material: 100% Polyurethane

Code	Length	Width	Weight	RRP £
9980 034	2,10 m	148 cm	1,7 kg	66.60

**NEW**

**TACKLE KEEPER**

Tackle Keeper – the intelligent system boxes from Black Cat! High-quality X-Strong plastic material with UV protection to preserve the colouring of your lures mean that these tackle boxes are not only durable but also protect your lures and their materials. The different compartments in each model offer you the flexibility to create your own individual box for your tackle. The clips are removable, and provide a good grip and optimal closure. The transparent lid also offers you a good overview of your small accessories. The Tackle Keepers are also 'worm-proof', i.e. resistant to plasticisers, and therefore suitable for all soft lures. Available in 6 versions.

**SPECIAL BOAT CAVE II**

The new edition of the innovative boat tent from Black Cat has been upgraded with a suspended inner tent to prevent condensation. This addition makes the Boat Cave 2.0 completely unique. The robust external material with a water column of 5,000 mm provides optimal protection against adverse weather. The centrally-divided entrance door that extends down to the floor of the boat also protects the interior of the Boat Cave from windy conditions. The internal Velcro pockets allow the door to be weighed down with lead weights to prevent uncontrollable flapping in the wind. Large transparent windows allow a clear view of your rods. Alternatively, the rainproof front can be replaced with a mosquito net, offering protection from insects on mild summer evenings. The separated spreader poles ensure optimal transport dimensions and a more lightweight design; includes a tent bag for easy storage. The three proven frame supports, which stabilise the Boat Cave 2.0 in stormy weather and during transport, have been extended with two additional supports near the bow door. These increase stability significantly further again. Note: no liability is accepted for air flow damage when travelling at excessive speeds. The bow door, which has been upgraded with an all-round Velcro strip for better rainproofing, also enables entry/exit and anchoring when the Boat Cave 2.0 is erected. A further innovation on the Boat Cave 2.0 is the extension of the proven 2-arch design with a third arch at the rear of the tent. The third arch can also be braced with small telescopic poles where necessary, acting as an awning to provide further protection of approx. 30 cm in the interior of the tent. Thanks to the individual fixing points in the form of D-rings, the Boat Cave 2.0 can be securely fastened to many common boat types both in its standard length of 3.60 m and in the shortened version of 3.3 m. On the shortened version, the front telescopic arch is lowered by approx. 15 cm. The Boat Cave 2.0 can be erected on fishing / catfish boats between 1.85 m and 2.2 m wide. The optimal usable width is 2 m. Material: 100% Polyurethane

**CAT CLOGS**

Robust and comfortable shoe for the water and at home. The Cat Clog has a sporty look, a very comfortable fit, is easy to clean and dries quickly. The ventilation openings distributed around the shoe ensure better breathability and safe wearing comfort on the bank and even in the water. The outer material is light as a feather and provides secure protection for the feet at the fishing spot. The heel strap can be folded back to any position to provide secure support or forward so that the angler can quickly slip from the bedchair into the shoe when a fish bites. Material: EVA/Polychlorid
